Bu'ul serves the freshest, seasonal contemporary Mexican cuisine from central and southern Mexico, in a luxurious setting, paired with a spectacular winery. Our cuisine is original and diverse, it has not only a recipe value but also a traditional one. Their name comes from the Mayan words ka'an (sky) and (ché) stick and could be defined as a raised bed. Chable's farm-to-table dining experience is based on the fruits, vegetables, and herbs that are sourced essentially from this organic garden.

## REDEFINING WELLNESS

Chablé strives to redefine wellness as a lifestyle, not a quick fix to burnout. To achieve that, Chablé turns to revere the mind, body and soul. By living in harmony with nature and honoring timeless traditions, Chablé offers different SPA journeys to better suit your needs and desires.

Drawing from ancient Mayan mysticism and rituals, Chablé places the spotlight on whole-body well-being through SPA journeys inspired by the purification the ocean provides, the balance of the tree—a sacred symbol of life—, and the transformative qualities of pure, fresh air. Guests can join a Temazcal ceremony, a centuries-old ritual within a “steam house”.

Besides spirituality-based journeys, Chablé also offers healing procedures like the Chablé Spiraling Sea Massage, which draws from the ocean tides to give guests spiraling strokes, thus creating an experience where body, mind and essence come together to achieve inner peace.

Our full-service SPA features eight treatment rooms: Two individual cabins with a pool, a healing & meditation cabin, a Vichy SPA room, two double rooms and a single room. For those looking to achieve well-being through fitness, the SPA at Chablé Maroma offers a wide variety of programs and activities like a fitness center equipped with Technogym gear and yoga sessions, as well as yoga for children.

SPA

JOURNEYS

The Chablé Maroma SPA program honors the celebration of life and the practices that nourish it. Rooted in the three expressions of movement in the natural world, our SPA experience is centered around the ocean as the source of life, and the understanding that life is dynamic and ever-changing. A healthy life allows for constant movement and adaptation. By releasing and letting go, washing away old patterns, and allowing for something new to be revealed, we can experience a renewed sense of vitality. Purification, cleansing, and renewal are integral parts of a living system and are essential in fostering new life.

## FITNESS

Chablé SPA provides a broad range of fitness programs and activities, to accommodate your existing exercise regimen or to assist you in creating a new one.

### PRIVATE FITNESS CLASSES

Private training sessions are also available by appointment. The SPA Reception can provide the current Fitness and Mindfulness class schedule or assist in setting up a private training session.

## ACTIVITIES

Well-being is achieved through connection to the environment, the body's work, and practice with the mind to redefine experiences, curiosity, energy, and the expansion of our senses, which we can do through our activities.

Every day, Chablé offers a series of activities created to deal with different moods: introspection or socializing, gentleness or intensity, serenity or vibration. Every day, we will deliver a program with our activities to your door. You can take part in as many as you choose.

Our experts will be happy to consult with you to understand your goals and collaboratively design a plan to help you achieve them during your stay at Chablé Maroma.

### WELLNESS - AWARENESS

Forget about the stress of daily modern life and enjoy what true presence means, that more than being physically in a place, it is about being connected with our essence and the environment. Chablé Maroma invites you to dedicate a little part of your day to being aware of yourself.

### WELLNESS - BALANCE

From gentle yoga to pilates in the water, Chablé Maroma offers activities to help you find mindfulness and balance in your life, focusing your breathing and body and helping you find physical and mental peace.

## CEREMONIES

We are in a land steeped in ancient tradition, a vibrant living legacy, heir to one of the most dazzling civilizations of pre-Columbian America and one of the most significant indigenous centers of Mexico. The contemplation of natural phenomena has a direct correlation with daily life, rituals, art, gastronomy, and oral legends. Therefore, each construction is intimately connected to the landscape, with ceremonial centers, temples, and pyramids having an association with rivers, lagoons, hills, seas, and cenotes.

### CONNECTION WITH ELEMENTS:

Meditation guides us to connect with the four elements of life through the experience and perception of each one. The chime of the elements; earth, air, water, and fire with the body, is perceived through our senses in the subconscious. Meditation allows us to truly experience the present moment, hand in hand with our breathing, movement, and mother nature. It is, after all, a distinct way of perceiving time.

## TEMAZCAL

The word temazcal translates to “steam house” and is a ritual rooted in one of the oldest forms of medicine, where the physical, mental and spiritual levels converge. Intentions are channeled through contact with the four elements: earth, fire, water, and air, within the embodiment of Mother Earth herself.
